

FINANCIAL REPORTING & HEAD OFFICE SUPPORT

Efficient production of accurate, usable financial information requires a significant level of expertise and time investment.

Effective financial reporting is key to business success and compliance with regulatory authorities. Navigating through this can be especially challenging for smaller firms who are unable to dedicate the required resource to properly record, understand and present high quality financial data.

Outsourcing some or all of your financial reporting needs is an efficient and cost-effective option for many businesses. Our experienced team of accounting experts provide a comprehensive range of services to UK regulated and hosted entities including hedge fund, private equity, real estate managers, corporate finance businesses and broker dealers.

Management Accounts
Monthly or quarterly provision of significant financial data.

Financial modelling
Preparation of varied ad-hoc modelling projects.

Accounting and bookkeeping
Ongoing maintenance of company accounts and transaction processing.

VAT Compliance
Compiling and submitting monthly or quarterly returns in accordance with HMRC rules.

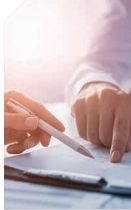

Statutory accounts preparation
Compilation of annual accounts for submission to the regulators.

Payroll
Periodic payroll for your staff including HMRC PAYE & NI compliance and digital payslips.

Audit liaison & support
We will work directly with your auditors to ensure an efficient and timely submission of your year-end accounts.

Human Resources
Support with employee contracts, company handbooks, standard forms and ad-hoc queries.

Budgeting & Cashflow monitoring
Ongoing review and reporting on key financial positions.

Registered Office / Company Secretarial support
Act as your registered office, manage filings with Companies House and support your company secretarial requirements.
